

QA MOBILE ENGINEER SENIOR

REMOTE & SOFIA

PRESENTED TO YOU BY i-RECRUIT

Overview

We are looking for a Senior Mobile QA Engineer for our client, a FTSE 100 and Fortune 500 listed company, to work in an ostensibly remote role with the main base of operations in Sofia.

You are able to demonstrate your ability to work with local and remote teams as well as being able to work on your own initiative, all in a fast paced highly multifaceted working environment.

You are a QA Engineer with more than 5 years of testing experience with at least 2 of these years in mobile testing.

Exposure to both Android and iOS native applications would give you a distinct advantage, as would the ability to use various test tools.

Responsibilities

Collaborating with the QA manager, you will participate in delivering applications to millions of players globally. Together with your team members, you will have responsibility for testing the applications under development.

The client works in a highly regulated industry and as such, all software applications developed are subject to strict regulatory requirements. Testing these applications must be done in this context with only the highest level of quality acceptable.

Requirements

We are looking for someone with demonstrable experience in testing, with at least 5 years experience, ideally 2 of these specifically on mobile testing. Agile will be your go-to methodology for software development.

Your understanding of mobile testing, specifically native applications on the major mobile platforms will be significant. It'll be a strong advantage if you have knowledge of building and crafting test cases from user stories and experience with complete software development lifecycle from concept to final release.

You will have had exposure to versions and flavours of mobile operating systems.

THE STACK

- BSc Degree in information systems, computer science or related field
- Experience with JIRA or similar issue tracking system
- Ability to gather debug information using the relevant SDK tools for iOS or Android
- Knowledge of the Atlassian toolset; Jira, Confluence etc.
- Knowledge of deployment mechanisms in use such as Continuous Integration systems – Jenkins etc.
- Prior use of test support systems such as TestFlight, HockeyApp, App Center

Personality

You have strong analytical & problem solving skills. You're a master of documentation and have outstanding interpersonal skills.

You're efficient in understanding and presenting technical information. You're passionate about customer experience and product quality.

You will be comfortable working with teams of offshore and near-shore software testers.

Remote Working

This is a remote, work from home position, but you'll be asked to come to the office a few times a month. All expenses will be entirely covered.

In this ever-changing world, our client recognises the benefits of working remotely, but it's important that you make human contact with your colleagues and get to know your team.

The Package

You wouldn't expect us to disclose the salary range at this early stage, but we're very confident that we'll meet your expectations. Our client understands the value of rewarding staff well, and has constructed a superb package. There's an annual discretionary bonus of up to 35% of the base salary.

And that's just for starters.

You'll get medical and dental cover for you and your immediate family. You'll get a personal interest allowance to encourage you to pursue a hobby away from the workplace. Work is important, but so is life. If you have a baby – as a mother or father – whilst in work, you'll be given 1000 BGN to celebrate and buy the essentials. That's a lot of nappies!

You'll be given plenty of opportunity to develop your skills and qualifications with plenty of support. And once the World gets back to something like normal, there are summer and Christmas parties and we told that they are quite the event...

Next...

If we've piqued your interest, we'd be happy to answer any questions that you may have. If you are happy to be considered, we'll need a CV, and after that, there'll be a fairly informal Zoom meeting with the relevant personnel.

If both parties are happy, there will be a more formal interview where your technical experience will be explored.

And if that goes well...welcome to your new job.

A bit about us

We have decades of experience of recruitment, business and commerce, and it shows. Trading since 2018, we're an independent and proud Irish company, working mainly within the tech sector across Bulgaria, Ireland and the UK. We have developed some very smart techniques for finding key staff for our portfolio of clients. It can be hard and laborious work, but it's really effective.

But you know that already, or you wouldn't be sitting there, reading this.

We treat our candidates with a great deal of respect, and because of this, we develop strong relationships with our ever-increasing database of talent.

We never forget that we are dealing with people who are making life changing decisions. We'd be *delighted* to help you on to the next stage of your career.
